## UX/UI Design Student

317-400-9396

abigaillkdegyter@gmail.com

5071 Tomahawk Trail  
Martinsville, Indiana

## Degree

Comprehensive Design is a degree that explores the links between many different areas of art and design. The curriculum mainly focuses on the concept of design thinking. This encourages students define design issues and create solutions to these issues through research and technology. With the incorporation of a minor in human-centered computing I will be on the best path for achieving success in a career of UX design.

## Skills

### Design Methods

Affinity Diagrams

Personas

Prototyping

## Projects

### UX Design Simulation Project

Oct 2019 - Nov 2019

Whirlpool, Internet of Things Problem

- Created a solution to Whirlpools problem of connecting house hold devices by creating a smart fridge that connected a variety of Whirlpool's resources
- Gathered data on users through research and interviews of varying demographics
- Created a story board, presentation, and prototype of the solution

### Solving Problems with Technology

Nov 2019 - Dec 2019

Potholes of Bloomington Problem

- Tasked with the problem of finding a solution that would solve a rift between Bloomington's local government and the residents of Bloomington
- Developed the idea of creating a app that would easily inform the local government of existing potholes in the area by encouraging residents to report them through a reward system
- Developed a prototype of the app as well as a website to give further information on the research and background of the solution
